About myself.

As a youn man I think life is good if it is full of challanges and I am looking for challanges. Why? Because I can learn by challanges. I can develope myself with challanges, they make me better.

Professionally I am very interested in IT, technology, development, data and marketing. Personally I am interested in psychology. In my free time I am a DJ and I like to spend lot of time with my family and friends.

I would work with great joy and enthusiasm in a place where I can create new things and develop my personality and my professional knowledge.

Professional skills.

- Data
- Online marketing
- BI
- Web dev.
- Data visualization

Lanuage.

- English
